2. Completed HTB Certified Penetration Testing Specialist

Demonstrates practical web application penetration testing skills, covering common and advanced web vulnerabilities.

The screenshot displays the HTB Academy user interface. On the left is a sidebar with the user profile 'blackpigies Student' (ID 554) and navigation options: 'Try Academy 2.0 (Beta)', 'LEARN' (Dashboard, Exams, Modules, Paths, Academy x HTB Labs), 'MY ACHIEVEMENTS' (My Certificates, My Badges), and 'REFERRALS'. The main content area is titled 'THE CERTIFICATION' and shows the 'Web Penetration Testing Certification' page. It features a 'CWES' logo with a spider graphic, a progress bar at 100%, and a 'BUY VOUCHER TO ENTER EXAM' button. Below the progress bar, the 'HTB Certified Defensive Security Analyst (HTB CDSA)' certification is described as a hands-on certification assessing security analysis, SOC operations, and incident handling skills. A 'The Certification' sidebar on the right lists 'Prerequisites', 'Certification Steps', 'Where To Start', and 'Certificate Validation'.

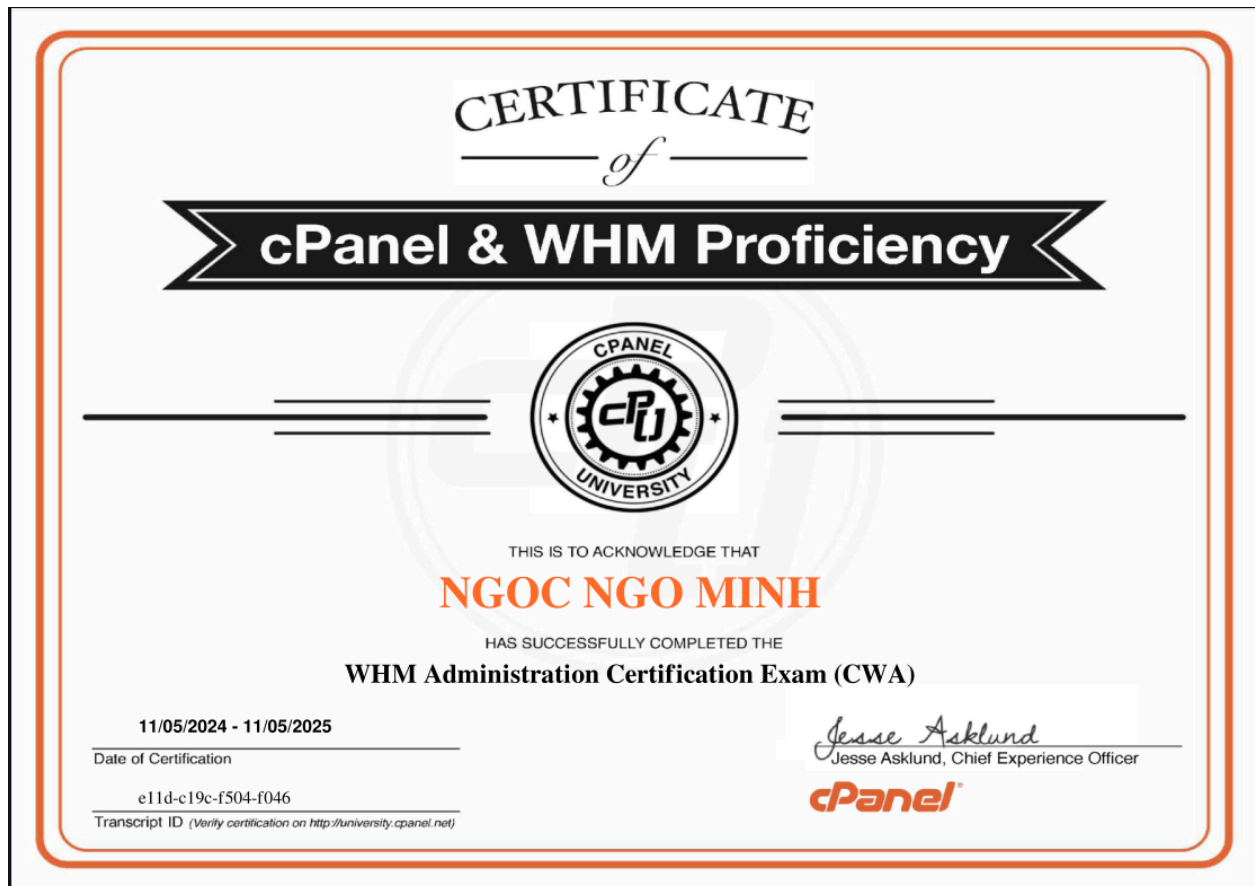

3. cPanel Professional Certification Exam (CPP)

Confirms professional-level expertise in cPanel, hosting management, domains, email services, and troubleshooting.

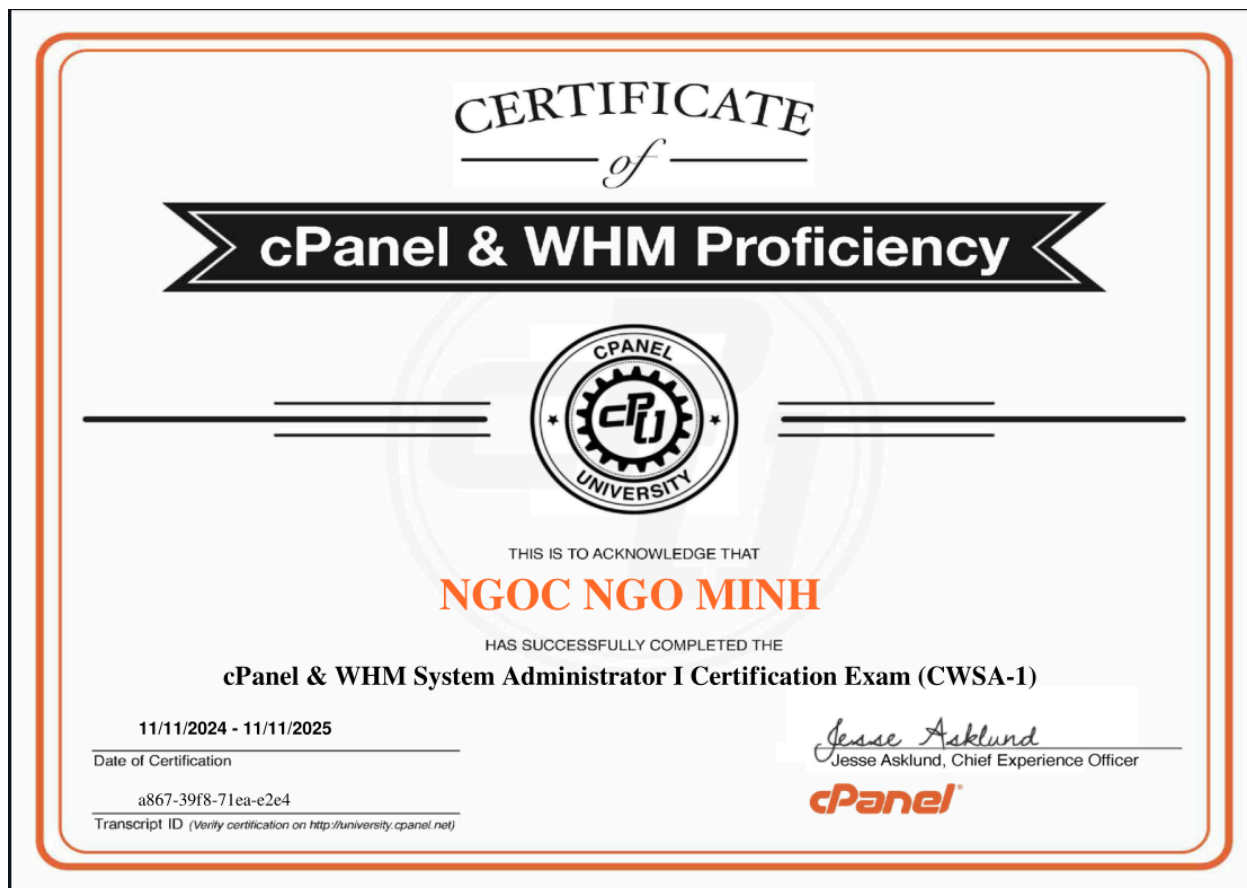

4. WHM Administration Certification Exam (CWA)

Validates skills in WHM administration, including server management, security configuration, and reseller management.

5. cPanel & WHM System Administrator I Certification Exam (CWSA-1)

Covers foundational system administration skills for Linux servers using cPanel & WHM, including installation and basic security.

6. cPanel & WHM System Administrator II Certification Exam (CWSA-2)

Demonstrates advanced cPanel & WHM system administration skills, focusing on performance optimization, advanced security, and backup management.
